SPONSORSHIP BROCHURE

What is SLoP?

Semester Long Projects or SLoP is an initiative by Developer Student Club, DA-IICT, open for students of any university in India who are new to open source software development to get started with open source contributions.

It is modelled to be a similar but smaller version of Google Summer of Code (GSoC). This global program matches students with open source, free software and technology-related organisations to write code. Similarly, SLoP aims to introduce new students to the area and help them gain confidence.

All the work will be on GitHub, which is used for source code hosting and collaborative software development. We have exciting cash prizes and goodies for you too!

Highlights of
SLoP 1.0

180+ Student
registrations

50+ Projects, including
The Linux Foundation
and Oppia

70+ Mentor
registrations

18K+ Page Views on
SLoP Website

Goals of the Program

- Inspire young developers to get involved in Open Source software development.
- Provide real-life development projects to students to give them an opportunity to learn more about current tools and technologies.
- Provide an excellent opportunity to get acquainted with Open Source technologies.
- Start a healthy development culture in college.
- Connect with experienced mentors, and be in contact with them even after the program ends.
- Prepare students for other Open Source programs like Google Summer of Code and Outreachy.
- Help students on how to select a project, interact with mentors and learn all other things to make their first pull request.

Scope of Sponsorships

Platinum
Sponsor

Perks:

- Logos on website.
- Company's video on the website.
- Participants Database.
- Emails of company circulating in colleges.
- The company could hire winners with their compute work report.
- Registration of participants on their platform.
- They can take sessions for participants online.
- The company's project could be one of the SLoP projects.

Gold
Sponsor

Perks:
